

A Major Milestone—The first edition of Sue's News and Views was published March 15, 2015. I haven't missed an edition since. As of this issue, I have published 100 editions of my monthly newsletter!

High School Graduate!

On June 2nd, Rylan graduated from Lake Oswego High School, this after receiving honors for completing LOHS's STEM curriculum pathway, which requires a heavy course load in science, math and engineering all through high school. Rylan is one of about 5% who accomplish this by graduation.

Morgan Shows

Morgan showed four days at Woofstock held in Vallejo June 8th through June 11th. No points this time because she was quite reactive to the judges. She did take home three second place ribbons though.

Another Agility Addition

After years of having to deal with a tunnel that wouldn't stay in place when the dogs run through it or having to use bungee cords tied to metal rods pushed into the ground, I bought saddle bags! The tunnel now stays nicely put and is easier to relocate from place to place. Why did I not do this sooner?

Deck Project—One Year Later

With all the rain then all the cold and wind, finishing the second set of stairs on Chris' deck was put on hold. The steps are now completed. Robert recently helped Chris lay a cement pad and put up risers. Chris then completed the stairs with Trex. Next will be railings & wire fencing between posts.
