

Family Visiting

We enjoyed having all the Pines visit us the week before last. They drove down on a Sunday, only stopping for gas and at one rest area and drove back home the following Saturday, again driving straight through to Lake Oswego.

Of course there was lots of pool time. The kids were in the pool every day Monday through Friday. They even enjoyed some nighttime swimming.

And with no place to go (due to COVID-19) there was also lots of baking done. Aubrey made sugar cookies. Sierra made cheese cake, banana bread, and she even made all of us crepes for breakfast one morning. And, as always when the kids visit, Grandma made shape pancakes

Further entertainment included all three kids climbing a 100 foot tree behind the barn, going up as high as 70 feet, not just once but many times.

Then there was climbing on the pool house roof. The kids did a great job helping Grandpa replace rotted ties on the solar panels located in front of the pool house.

Chris and Miles joined us at the end of the Pine visit. Miles and Axel met each other for the first time and immediately liked each other. You can see they are a good match considering Miles is a big GSP at 70 pounds.

Splish Splash

Morgan is now entered in hunt field trials on July 11th & 12th. Not only is she learning to hunt, thanks to her breeder, she is now being introduced to swimming in the canals at the hunting preserve. She hasn't yet taken off swimming but she is starting to go into the water with the other GSPs.
